

ABDULRAHMAN WAEL NABIL

Cybersecurity Student — Penetration Testing & Red Team

Cairo, Egypt | wabdulrahman967@gmail.com | 01000187558 | github.com/wabdulrahman967-png | tryhackme.com/p/wabdulrahman967

PROFILE

Information Technology student at Hit Academy majoring in Cybersecurity, building toward a career in offensive security. Trained through two academy programs totaling 120+ hours covering penetration testing, Red Team operations, and application security, backed by daily hands-on practice on TryHackMe. Currently seeking a Cybersecurity or Penetration Testing internship.

EDUCATION

Bachelor's Degree in Information Technology, Cybersecurity

2025 — Present

Hit Academy

CERTIFICATIONS & TRAINING

Cybersecurity Academy (Undergraduate Level) — Penetration Testing & Application Security

2026

National Telecommunication Institute (NTI), with EG-CERT & NTRA · 60 Technical Hours + 12 FreeLance Hours

Undergraduate-level academy program with Fortinet and Cisco as technology partners, combining structured technical training with applied freelance-style project work.

- Penetration testing methodology and hands-on practice
- Application security fundamentals and secure development concepts
- 12 hours of applied, freelance-style project work under academy mentorship
- Delivered in partnership with EG-CERT and the National Telecom Regulatory Authority (NTRA)

Red Team Training — 60 Hours

Feb 2026 — Jul 2026

EDUX Academy · Credential ID Ed00001257

Covered the full offensive security lifecycle across 17 modules, from ethical hacking fundamentals through advanced Red Team collaboration and reporting:

- Introduction to Ethical Hacking & Offensive Security
- Network Fundamentals & Network Penetration Testing
- Linux Fundamentals
- Information Gathering & Enumeration
- Vulnerability Assessment & Exploitation Basics
- Web Application Penetration Testing
- Programming & Exploit Development
- System Hacking & Privilege Escalation
- Cryptography
- Metasploit Framework
- Active Directory Security
- Cloud Security
- Social Engineering & Phishing
- Dark Web Techniques
- Pivoting & Firewall Evasion
- Red Team Collaboration
- Reporting & Documentation

SKILLS

Cybersecurity: Penetration Testing, Ethical Hacking, Red Teaming, Web Application Security, Application Security, Network Security, Vulnerability Assessment, Information Gathering, Enumeration, OWASP Top 10, Active Directory

Tools: Kali Linux, Burp Suite, Nmap, Metasploit, Wireshark, Fortinet, Cisco

Programming: Python, Bash, SQL

Platforms: TryHackMe

Languages: Arabic (Native), English (B2)

PROJECTS

RedMatch

Python · Flask · scikit-learn (TF-IDF / NLP)

Matches a CV against a job description and returns an accuracy score, matched skills, and the gaps to close — built for security, SOC, and Red Team roles.

- Applies TF-IDF and NLP techniques to compare CV content against job description requirements
- Surfaces matched skills alongside gaps so applicants know exactly what to close
- Deployed as a live Flask web app
- Live: arwael.pythonanywhere.com
- Source: github.com/wabdulrahman967-png/redmatch-security-cv

Password Security Suite

Python · Streamlit

Evaluates password strength using true entropy and breach checks, generates cryptographically secure passwords, and includes a Caesar cipher lab.

- Entropy-based strength scoring paired with known-breach checks
- Cryptographically secure password generator
- Includes an interactive Caesar cipher lab for teaching basic cryptography
- Live: password-security-tool-mmwxjqs8hppqykhvajcmln.streamlit.app
- Source: github.com/wabdulrahman967-png/password-security-tool

ADDITIONAL INFORMATION

- Maintains daily hands-on practice through TryHackMe labs
- Open to Cybersecurity / Penetration Testing internships
